About Us

Smart Utility Management Services

Omni Utilities is a leading provider of energy management and comprehensive utility solutions for section titled commercial, industrial, and residential sectors. We specialise in aiding our expanding clientele by providing precise and reliable energy management services, including precise monitoring of municipal meters and supplementary SMART AMI Meters at primary bulk billing points.

OUR SERVICES

DATA LOGGING

Harness the power of sunlight with our expert data logging service for solar installations. Through cutting-edge data logging, we provide detailed reports for informed decision-making on system size and battery capacity.

UTILITY MANAGEMENT

Rely on our experienced Utility Management team to implement consumption and cost-saving practices for efficient utility usage. Through Check Metering and Sub-Bulk metering, we provide more data to Property Managers

ACCOUNT UTILITIES

Discover our expert utility account analysis service, tailored to pinpoint and fix any billing, tariff, or demand-side issues.

Alongside our AMI Bulk Metering solutions, enjoy hassle-free, precise utility readings delivered monthly. Say goodbye to guesswork and hello to efficient, reliable operations with our user-friendly technology.

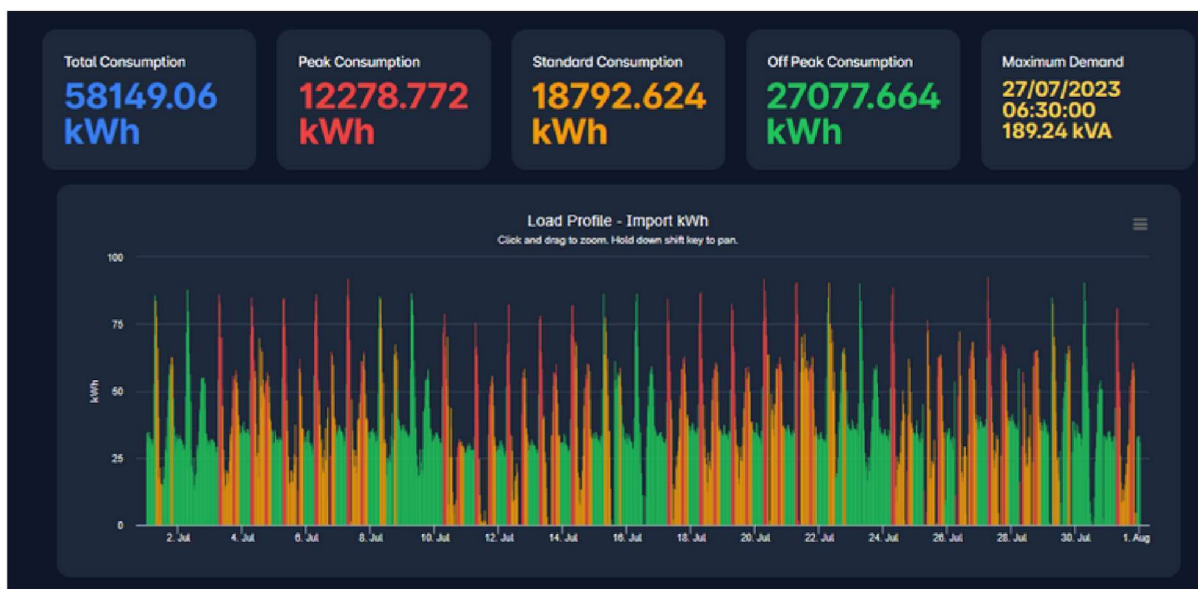

UTILITY RECOVERY

Ensure the security of your revenue and cash flow with our Smart Prepaid and Postpaid utility services. Our intuitive and reliable Smart metering solutions are designed to safeguard your revenue collection process efficiently.

SMART BULK METERING SOLUTION

A Smart Bulk Check Meter is installed after your main meter, and paired with an easy-to-use, online monitoring platform. This setup helps Bulk consumers like multi-residential properties, factories, and shopping centers to monitor and manage their energy usage as well as compare with Supply measurements. With this tool, you can see exactly how much energy you're using, plan for the month ahead, find ways to reduce energy consumption, and make sure your municipal bills are accurate.

The platform has all of the tools needed to empower the bulk consumer on what is happening with the energy at their property, building or machine

Omni Utilities' Smart Metering service also offers Utility Management recommendations, personalized advice for reducing consumption, Bill Verification, Cost Calculation, assessment of Alternative Generation needs, Municipal Consulting, and Tariff Comparison as supplementary features.

Billing Indicators		Jul 2023				Tariff: CoE Tariff C (230V/400V)	
Description	Rate	Qty	Excl	Vat	Total		
CoE Tariff C Consumption (230V/400V)	3.189	58117.812	185,337.70	27,800.66	213,138.36		
CoE Tariff C Demand Charge (230V/400V)	2.386	189.24	451.53	67.73	519.26		
CoE Tariff C Fixed Charge (230V/400V)	3220.24	1	3,220.24	483.04	3,703.28		
CoE Tariff C NAC Charge (230V/400V)	69.19	191.472	13,247.95	1,987.19	15,235.14		
Total			202,257.42	30,338.62	232,596.04		

SMART PREPAID AMI SOLUTIONS

- **Real-Time Monitoring:** AMI SMART meters provide real-time data on utility consumption, enabling utilities to accurately track usage patterns and trends. This real-time data ensures precise billing and helps identify any discrepancies or anomalies promptly.
- **Remote Disconnect/Reconnect:** With Omni Utilities' AMI SMART meters, utilities can remotely disconnect and reconnect supply, providing greater control over prepaid accounts, until payment is made, thereby incentivizing timely payments and reducing revenue losses.
- **Enhanced Accuracy:** Traditional recovery systems may suffer from inaccuracies due to manual meter reading errors or tampering. Omni Utilities' AMI SMART meters eliminate these issues by automatically recording and transmitting usage data, ensuring accurate billing and reducing revenue losses associated with underbilling or tampering.
- **Data Analytics:** Omni Utilities' AMI SMART meter data can be leveraged for advanced analytics, allowing properties to gain insights into customer behaviour, identify potential areas for improvement, and optimise revenue recovery strategies. By analysing usage patterns and trends, properties can tailor prepaid electricity offerings to better meet customer needs and preferences.

In summary, Omni Utilities' AMI SMART metering offers utilities and property managers a powerful tool for efficiently managing and recovering prepaid electricity usage. With real-time monitoring, remote disconnect/reconnect capabilities, enhanced accuracy, and data analytics, Omni Utilities' AMI SMART metering enables utilities to optimise revenue recovery processes and provide better service to customers.

REVENUE RECOVERY SOLUTIONS

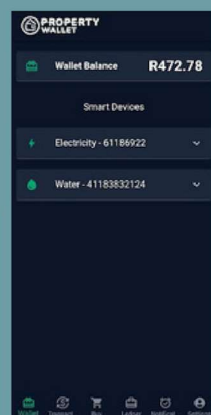

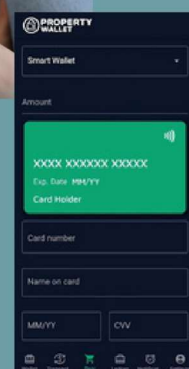

Introducing our Property Wallet:

Your comprehensive utility management and revenue recovery solution designed to streamline your operations and maximize efficiency.

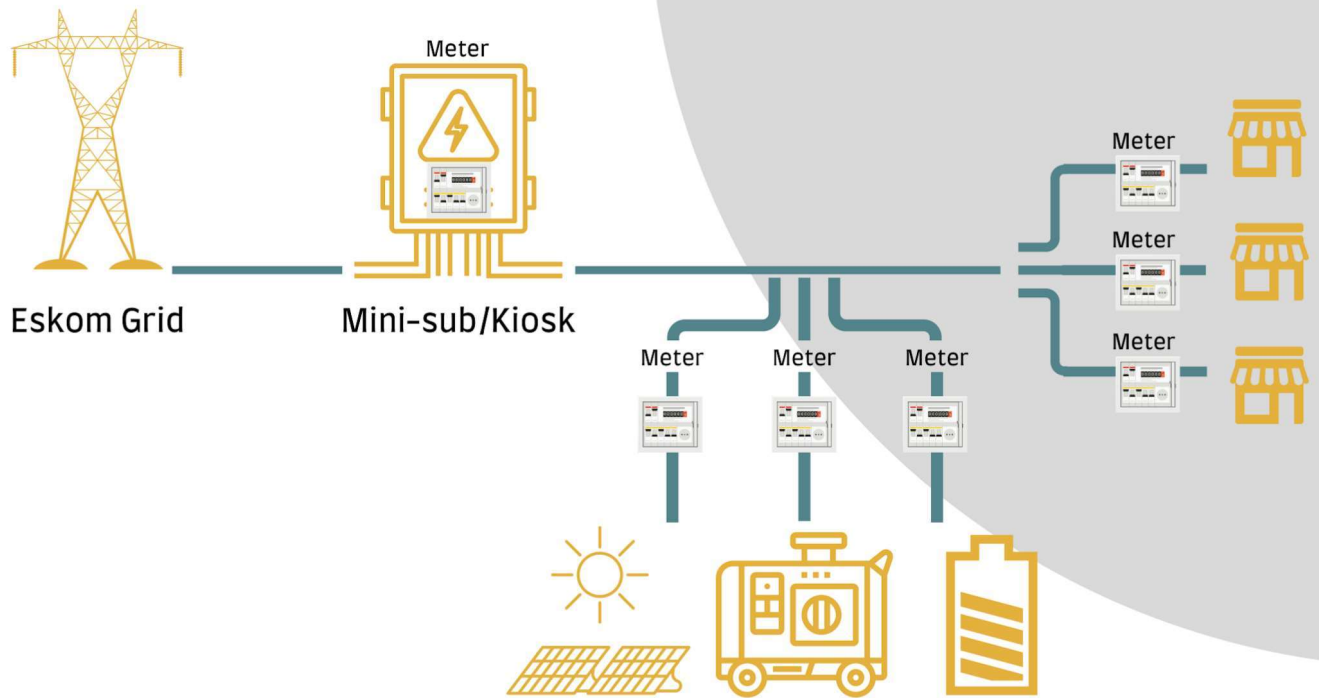

With Property Wallet, you have access to an intuitive platform where you can effortlessly view and monitor your energy consumption in real-time, enabling informed decision-making. Say goodbye to the hassle of manual meter top-ups; our platform allows for convenient recharging of prepaid meters online, ensuring easy and user friendly payment methods

Gain valuable insights into your utility usage patterns with our easy-to-generate reports, empowering you to make data-driven decisions and optimize energy efficiency. Stay ahead of high consumption and potential issues by setting custom alerts tailored to your needs.

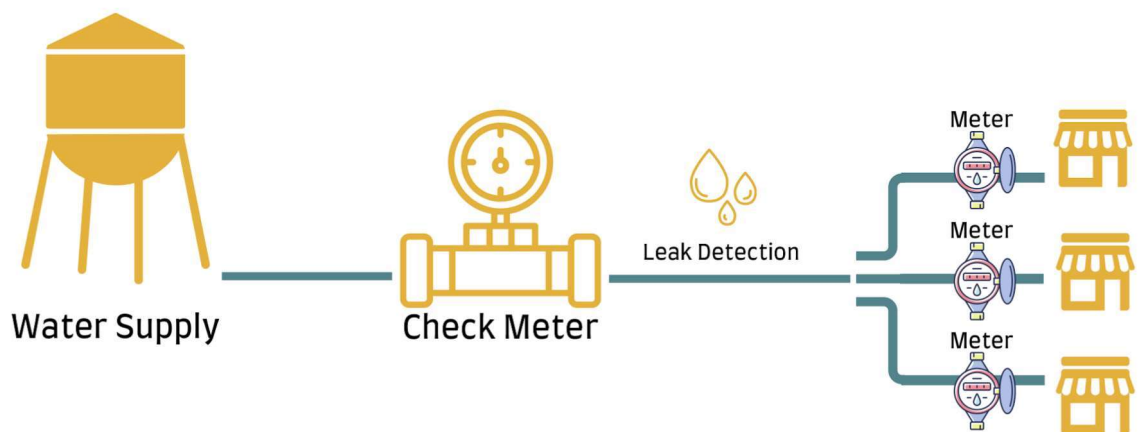

Experience the convenience and control of utility management with Property Wallet
